## REASONS NOT TO GET VACCINATED AGAINST COVID-19

**1 IT COULD KILL YOU.** There are already 15,000 covid vax-correlated deaths listed on the CDC's own VAERS reporting site in just the last 9 months since the shot came out, but studies show that these deaths are likely only 1-10% of the true count, and the government does their best to cover it up. We may be looking at half a million dead in the US from the shot already.

**3 EMERGENCE OF NEW VARIANTS.** As poor a protection as the vaccines offered to begin with, they do even worse with the variants. The shots do absolutely nothing to stop the Delta variant, and are therefore becoming obsolete. The vaccines themselves are also actually driving the variants, as numerous scientists warned of in advance.

**5 PROTECT OUR CHILDREN.** The best thing you can do for your children is to let them lead a normal life again, without masks, vaccines, or worry about the virus. Children typically have zero or extremely mild symptoms, and if they are sick, they can easily be treated with the same safe medications as adults. Children do not die of Covid-19, thank G-d. Even children who are immunosuppressed do well with the disease. The miniscule number of cases reported are actually children who were hospitalized for other causes or who died from their underlying conditions. In contrast, many children have tragically already been murdered by the covid vaccine, passing away of a heart attack within a few days or weeks of the shot. An unacceptably high percentage of young people who are vaccinated for Covid get myocarditis, which leaves lifelong cardiac effects, and has a 5 year mortality rate of 50 percent, according to the Mayo Clinic. The much-feared MIS-C, which is touted as a reason to vaccinate, is actually listed on the FDA report as a possible side effect of the vaccine.

**6 PROTECT OUR FUTURE CHILDREN.** Expectant mothers have a much lower risk than they are led to believe, with only 0.128 fatality rate according to the CDC, and that is without the early treatment which is safe and effective for pregnant women. On the other hand, the covid injection has killed an untold number of unborn babies already, with miscarriages skyrocketing and many stillbirths as well as babies born with birth defects and tremors.

**8 MOST VACCINE SIDE EFFECTS GO UNREPORTED.** Severe side effects are more common than you realize, and include stroke, heart attack, blood clots, seizures, paralysis, blindness, deafness, severe depression, psychosis, severe digestive problems, debilitating exhaustion, and disabling pain. They also include cancers, leukemias and lymphomas, auto immune diseases such as diabetes, and other complications. Doctors usually do not have time or inclination to fill out a 30-40 minute report, and are heavily discouraged from linking health problems to the shot. Patients and family members often don't connect the dots between an injection they think is safe and a health problem that arises afterwards. If they do, they usually do not know how or where to report. Many doctors who did attempt to report a covid-vaccine induced death found that the system refused to upload their report.

**10 OPEN UP YOUR WORLD.** Open your eyes to the grave dangers to our health, life, and freedom by those who pretend to have our best interest at heart. Stand together and say "NO!" to vaccine mandates. REFUSE to be injected with a poisonous substance in order to travel to Israel or live your normal life. If we ALL stand together as one against the tyranny, it will fall, with Hashem's help.

**2 COVID-19 INFECTION ALMOST NEVER LEADS TO POOR OUTCOMES WHEN TREATED EARLY AND PROPERLY.** On top of the 99.7 percent survival rate even without proper treatment, almost all the 0.3 percent who have died could have been saved with safe and effective early treatments, which have been murderously suppressed. Additionally, virtually all of the complications of the disease, such as organ damage, and "long covid", also do not occur if covid is treated early and properly. It is critical to know that Remdesivir, given in hospitals as a super pricey covid treatment despite its worthlessness, actually causes kidney failure and fluid on the lungs, killing many and leaving others with kidney failure. Are most post-covid kidney problems actually Remdesivir poisoning?

**4 THE SHOT PROMOTES THE SPREAD OF COVID-19.** Not only is the shot useless to stop the spread (even the manufacturer does not make that claim), it actually causes contagion, as vaccinated individuals were found to carry 251 times the viral load of unvaccinated ones in their nostrils. Many people have also become ill immediately after vaccination, and then infected vulnerable family members, some of whom have died.

**7 REAL WORLD DATA DEMONSTRATE VACCINE DEADLINESS AND INEFFECTACY.** The vaccines did not undergo the normal routine of animal safety testing and then many years of Phase 1, 2, and 3 trials. No amount of money or "science" can buy time, which is what is needed to see the long term outcomes before this brand new genetic medical treatment is rolled out on the world population, including our most crucial frontline workers and military. In fact, the most basic data and studies are not being made available to the public, stories of deaths and injuries are being censored and unreported, and doctors are being threatened with losing their licenses if they speak the truth of the adverse effects they're seeing in their patients. Even so, the half a million adverse event reports are on VAERS for all to see, a small fraction of the true measure of devastation wrought by this injection.

**9 THE BEST WAY WE CAN GET BACK TO NORMAL.** is to categorically refuse the covid shot and the associated testing and masking mandates, and SIMPLY GO BACK TO NORMAL. If anyone is sick, treat them, just as you treat other illnesses. Covid is less deadly than many other outbreaks that we have dealt with recently, such as bad flu seasons, and it is no reason for the world to grind to a halt. The truth is that we are being bullied and controlled, and you will never gain freedom and normalcy by giving in to a bully.
