

Tatty, Mommy, why did you **risk my life** with an experimental vaccine?

Dad, Mom, why did you **risk my health** with a novel genetic therapy, when I'm not even sick?

Abba, Ima, why did you **risk my ability to have a family** by vaccinating me for an illness that's not dangerous to me?

• **In the short time** it's been in use/trial, **eight kids have already died** and others have had life threatening blood clots, or become disabled, after the COVID vaccine. Many, many unborn babies have died after their mothers' vaccination. **See their stories here: <https://tinyurl.com/NoCovidShots4Kids>**

• **A careful reading** of the numbers presented in the recently published NEJM study shows that of the pregnant women who received COVID-19 injections during the first two trimesters, 104 out of 129 miscarried. This translates to a miscarriage rate of 81%. For comparison, the typical pregnancy loss rate is 25% at 4 weeks, and once the heartbeat is heard at 6 weeks, only 5% of pregnancies are typically lost.

• **Third trimester vaccination is also unsafe.** Please see VAERS for reports of stillbirths and preterm rupture of membranes after the injection. We have received personal stories of these events as well.

• **Pregnant women** can safely prevent AND treat COVID with HCQ, which is CDC-approved for pregnancy.

• **By law, the vaccine companies have been absolved from all financial liability, no matter what injury or death their products may cause.** <https://www.phe.gov/Preparedness/legal/prepact/Pages/default.aspx>

Would you buy a car – or even a car seat – from a company that is not financially liable for damage or death resulting from using their product? Why would you "buy" a COVID vaccine from such a company?

• **How extensively** was the COVID vaccine tested on kids? **Standard testing time for a new vaccine is as many as fifteen years!** First on animals, and only afterwards on people. This time, somehow, the FDA has "miraculously" - in matter of several months - "determined" that this shot is safe for kids! Trials are ongoing till 2023. **Is your child a guinea pig to test a trial drug on?**

• **Mainstream medical doctors worldwide are concerned about the safety of this vaccine!**

**PARENTS! THE CDC WANTS TO PROFIT AT YOUR CHILDREN'S EXPENSE!
GET EDUCATED AND EMPOWER YOURSELVES! ADVOCATE FOR YOUR CHILDREN!**

Studies¹ worldwide show that **children rarely transmit COVID infection** to adults or other children.

Children ages 0-19 have a **99.997% survival rate** from COVID-19

Children who get sick with Covid almost always have very mild cases and **Ivermectin can safely treat COVID in kids.**
