

COVID-19 Vaccine INFORMATION

Should I really be taking the Covid-19 Vaccine?

You have a choice.

No government agency, organization, doctor, or even a Rav can force a medical intervention upon you.

1. Is there a need altogether?

Although COVID is a serious infection, according to the CDC the actual chance of death for a healthy individual (even without any treatment) is very low.

SURVIVAL RATES BY AGE

0-19: 99.997% 50-69: 99.5%

20-49: 99.98% 70+: 94.6%

2. There ARE preventions and cures which tragically are being suppressed.

There are safe, proven medications to prevent COVID, which are *more effective than the vaccine*. Once-a-week Ivermectin is extremely effective at preventing COVID. HCQ and Ivermectin also have an *extraordinarily high cure rate for COVID*. See <https://covid19criticalcare.com> and <https://c19protocols.com>.

3. The shot does not prevent transmission.

Contrary to popular belief, the shot will not prevent you from spreading COVID to others. The vaccine companies, as well as the FDA, explicitly admit that they do not have evidence that the shot will prevent infection or transmission. They only claim that it may lessen the severity of symptoms.

4. This shot is not yet FDA-approved.

It is an experimental injection which is still in Phase 3 trials until at least 2022 or 2023. Everyone who receives the vaccine is therefore part of the Big Experiment.

5. The vaccine companies are not liable.

If you get ill or die as a result of taking this injection, you cannot sue the manufacturer for damages. They are immune from liability according to the PREP Act and the National Childhood Vaccine Injury Act of 1986.

6. Thousands of reported deaths and injuries.

Although the CDC denies causation and the media willfully suppresses the stories, there have been thousands of reported deaths and injuries within days - and sometimes immediately - after receiving these injections. The government's database of these reports (VAERS) can be accessed at medalerts.org.

7. SCIENTISTS HAVE GRAVE FERTILITY CONCERNS.

Many top doctors and scientists strongly believe that the vaccine will severely impair both men's and women's fertility, and indeed the stories are starting to come in that prove their words true. It was because of such serious concerns that former Pfizer VP and chief scientist Dr. Michael Yeadon had petitioned the court for the vaccine trials to immediately be halted.

8. Shochad Y'aver Pikchim.

The local healthcare organizations in each community are receiving MILLIONS of dollars from the federal government under the American Rescue Plan (<https://bphc.hrsa.gov/program-opportunities/american-rescue-plan/awards>), to push the COVID vaccine on the local residents. If you feel a certain pressure and coercion, money may just be the reason why.

9. Shev V'al Ta'aseh.

Thousands of scientists, virologists and doctors around the world have risked their careers to publicly state that the COVID vaccines are liable to cause great short- and long-term harm, but their opinions are being suppressed. The Peleh Yo'etz states that even if 99% of doctors say a medication or treatment is safe and only 1% of doctors say it is dangerous and life-threatening to use it, one would have to be a fool not to abstain. *Shev v'al ta'aseh adif*. See tinyurl.com/DoctorsSpeakUp for an extensive list of doctors worldwide warning of the dangers of the COVID vaccine.

10. Numerous Rabbonim warn strongly of the dangers of this vaccine.

Many, many Rabbonim who have thoroughly researched the COVID vaccine are urgently saying NOT to take it, to the point of calling the vaccine suicidal. Just because you trust your Rav or doctor does not mean that they are well-versed in this specific area. Only trust information from someone who impartially and carefully researched both sides. If your Rav or doctor refuses to hear you out, find someone else to ask. As Rav Elya Ber Wachtfogel shlit"a said, the only Rabbonim who promote the injection are the ones who did not hear out both sides. For a list of Rabbonim opposed to the vaccine, go to tinyurl.com/rabbonim.

To hear stories and the views of impartial doctors about the COVID-19 vaccine, call the following hotline: 718-223-5535.
