

MI LASHEM AILAI

My dear nation. I must tell you what is on my heart. Last week was Parshas Shemos. As my family discussed the parsha at the Shabbos table, so many things struck me which apply directly to our terrible situation today.

If you still prefer to live with your head in the sand, stop right here, because Be'ezras Hashem I am going to be saying some hard, unpleasant truths. But if you want to help save our people and humanity, keep reading.

I want to talk about true leadership. Moshe Rabeinu was chosen by Hashem to lead Klal Yisrael because Hashem saw that he cared for the individual. Vayar b'sivlosam. He saw a Jew groaning under a heavy burden and he took it and carried it himself, even though he was the prince and he did not have to. He endangered his own life by killing the mitzri who was about to kill Dasan, and then involved himself in the dispute between Dasan and Aviram, to rebuke the wrong that he saw being done - almost resulting in his own death. He saw a lamb wander away and he followed it and cared for it tenderly. Moshe took whatever time was necessary out from his own avodas Hashem and was willing to sacrifice whatever was necessary - to take care of the needs of a yachid or even of a little sheep - because caring for the individual *was* avodas Hashem for him! That care and concern for the individual marked him as a leader.

Leadership obviously ran in Moshe's family. His mother and sister, the midwives Yocheved and Miriam, had been secretly ordered by Pharaoh to kill every baby boy upon birth, and to pretend it was a stillbirth. Yocheved and Miriam could easily have rationalized passively allowing the sickly babies to die "for the greater good" so that Pharaoh would at least see *some* compliance with his mandate and not kill the midwives. It would have been "logical" to calculate that refraining from saving a few babies would enable them to continue in their positions and save many more children in the long run, who otherwise would likely be killed by whatever midwives Pharaoh would put in their places. But Yocheved and Miriam *feared Hashem* and did *not* "rationalize away" murder in *any form*, for *any reason*. One who fears Hashem does the right thing and does not fear humans, but trusts Hashem for the results. As true leaders, the midwives risked not only their positions but their very lives by saving *every single baby*. On top of this, when Pharaoh angrily summoned them to his palace to question them about their disobedience, Miriam did *not* answer diplomatically. She minced no words, but spoke truth to power, calling Pharaoh out on his murderous plan to his face.

Yocheved and Miriam did *not* suffer for their bravery. To the contrary, the Torah tells us how Hashem saved them miraculously and rewarded them eternally.

Remember that this is the same Miriam who had the courage to tell her father, the tzaddik Amram, the leader of Klal Yisrael, that he was making a grave mistake by divorcing his wife in order to avoid continuing to bear children only in order to see them drowned. Miriam stated the facts bluntly, "Your decree is worse than Pharaoh's." She was right, and her parents remarried and bore Moshe, our redeemer. Amram, as a true leader, *publicly corrected his mistake*, and Klal Yisrael followed his lead.

A true leader does not let their humility stand in the way of saying what must be said. A leader does *not* wait to see what others will do, but *takes the initiative* to act for the sake of the community. A true leader is not afraid to admit publicly that they were wrong. And a leader is willing to give up *everything – their life, their position, their honor – to save the Klal*.

On the other hand, as we also see in this parsha, Iyov did NOT speak up when Pharaoh voiced his evil inclinations towards Klal Yisrael. Iyov was afraid of angering Pharaoh and believed that it wouldn't help anyway. But Iyov was punished with severe unimaginable suffering, Rachmana Litzlan, as a result. Because when it hurts you the way it should, you don't stop and think of the possible repercussions. You just scream. Iyov failed to show leadership. But Yisro, seated there as well, *did* speak up. He saw Pharaoh's anger begin to burn and he fled for his life. While it may have seemed that he suffered in the short term for speaking up, in truth he gained immeasurably and eternally- he ended up becoming a grandfather of Levi'im, and his descendants were in the Sanhedrin.

Another tragic example of failed leadership was preceding the churban Beis Hamikdash. There were many chachomim sitting at the seuda who witnessed the wealthy, powerful host humiliating Bar Kamtza by throwing him out, and they refrained from speaking up against this grave wrong. Presumably they were very uncomfortable to speak against their host and were afraid of the repercussions of alienating someone so rich and powerful. But their lack of protesting a terrible wrong that was being committed in front of them led directly to the destruction of the Beis Hamikdash, which not only was so horribly tragic in itself, but also saw the death of hundreds of thousands of Jews, and is the root cause of every tragedy that our people have suffered since, including the Holocaust.

Chazal tell us about the generation before Mashiach, that it will be "Pnei Hador Kipnei Hakelev" the leaders of the generation, instead of being true leaders, will be constantly looking over their shoulder to see what is pleasing to the people, and doing that - just as a dog seems to be leading its master when they walk together and the dog walks ahead, but at every corner it actually looks back to see where the owner wants to go.

It's very clear that most of the leaders of the secular world mold their agendas towards what the people want and have no backbone. Their "morals" are fluid. They are not leaders, but followers.

What is happening with Klal Yisrael? Governments around the world have been making arbitrary decrees for close to two years now. How many of our leaders have researched the truth of the governments' claims and thought deeply about what the governments' agenda might actually be, and what will be the end result of following along with their strong-arm tactics against their citizens?

If you were ever in the position of helping a child who was being bullied, or someone who was the victim in an abusive relationship, you surely know that giving in to a bully is always a mistake, as the bully becomes ever more empowered and bolder in their demands and their abuse. Was there ever a story in which a government took away the citizens' freedoms bit by bit and the citizens simply complied, and it ended happily ever after? Any student of history knows that governments don't work that way. We are in the midst of a descent into totalitarianism, which in the past has been fatal for many of the occupants of the countries in which it occurred.

We need bold and brave people who will stand up as the Torah demands from leaders. We need people who will NOT CARE about losing money that the government doles out in exchange for our obedience. We need leaders who will not care about losing government relationships they may have cultivated over a long period of time to help Klal Yisrael. The actual needs of Klal Yisrael come before those relationships. We need leaders who will not think about their personal safety, as my Rav showed me, that the Rambam says clearly, that when fighting a Milchemes Hashem, one may not be afraid.

We need people who will act as the Levi'im did in Mitzrayim when they refused to start working for Pharaoh, even as the rest of Klal Yisrael made the mistake of their lives and fell into slavery. We need people who will act as the Levi'im did by Chait Ha'eigel and refuse to go along with the sin, no matter who is mistakenly promoting it. And we need people on whom the spirit of Hashem rests who will answer the call of "Mi Lashem Ala?" and stand up to show our nation, which has lost its way, the truth.

Right now, Jews and other citizens are being bullied into taking shots that are NOT working against the virus. All around us, thousands of fully vaccinated people are getting sick with corona right and left, and some of them are dying. These shots not only are ineffective, but they have killed over 60,000 people which are documented worldwide, which is perhaps ten percent of the true amount, as most deaths and disabilities after the shot go unreported. Additionally, the very notion of a vaccine for the virus is unnecessary, as very effective, safe and decades-old medications exist to treat corona, but the same governments vilify them, in an effort to make the vaccine appear as the only way out of the mess that they themselves have created and are using for their purposes.

But RIGHT NOW people are losing their jobs, livelihoods, the degrees they have worked on for years and have almost achieved, and their very careers, if they have their eyes open wide enough to refuse this poison. People who have natural immunity, which is documented by dozens of studies to be much more effective and durable than the shot, are being given the terrible choice to get the shot or lose their family's source of income. WHERE ARE OUR LEADERS?

The Gedolim of those times *closed down Voloziner Yeshiva* rather than submit to the government's mandate which they foresaw would harm Klal Yisrael. Brave Rabbonim – true leaders - have paskened that schools must close their government programs rather than coerce the teachers to vaccinate. *Which administrators will show leadership and loyalty to Hashem above all else and do the right thing – rather than risk harm to a single teacher? Which employees will come out as leaders and walk off their jobs – as if they had been told to work on Shabbos - rather than put themselves in sakana, or put others in sakana by showing compliance with murderous demands?*

WHERE ARE OUR LEADERS when Jews are excluded from shul if they refuse an experimental injection which countless Rabbonim say is absolutely assur? Where are our leaders when KIDS are excluded from activities if they don't get this shot which may impair their fertility, cause myocarditis, and shorten their lifespan, chas veshalom? Kids do NOT die of corona - no matter what the media might try to feed you, just think about all the kids you know, over the last 21 months - but EIGHTY kids thru age 19 were already listed on December 10 as having died after the shot on the CDC VAERS site. In Eretz Yisrael, my friend who is a health care practitioner is drowning in telephone calls from people who took the shot close to

a year ago coming down with terrible health problems!

We need people who are brave to stand up and call out the rishus. Become a true leader! If you are a doctor, a Rabbi, a principal, a parent, or anyone at all - you need to do research. There is NO EXCUSE. When the history of these times will be written, you will suffer great shame if you did nothing. There is a kosher website where you can become fully informed, macabim.org. Spend a few days or weeks listening to the top world doctors and scientists whose recordings are on the site, and read the publications, and you might be empowered to start speaking up in your community!

If you think that it is our job to blindly follow the leaders who have come out in support of the shots and the mandates, and we have no business doing our own research and coming to a different conclusion, that is a mistake, and it is not Torah hashkafa at all.

My Rav taught me, based on the Chovos Halevavos, that every person MUST think for themselves. To think otherwise is a huge mistake in the meaning of emunas chachomim and daas Torah. The mistaken hashkafa is tragically prevalent lately and causes great damage.

Think of this: Each of us says the bracha in the morning "hanosein lasechvi vina" and each person says "ata chonein la'adam da'as". It does not say "chonein laRabbanim da'as". It is a mixture of misguided hashkafos and laziness to think that we should or even may leave all the research and decision making on this life and death topic to Rabbis and/or doctors. The truth is, the Rabbis are relying on the doctors, who are relying on the "experts", such as the CDC and FDA, who have their own financial agendas. YOU NEED to check things out for yourself! Do NOT rely on "experts", as the CDC and FDA have brainwashed the population to do.

To think that our leaders cannot make a mistake is nonsense. In the Torah, Hashem constantly points out the mistakes of the greatest people, such as the Avos, the shevatim, and Moshe Rabbeinu. Who today is greater than them, that he could not err in trusting the government and believing this shot is ok? Korach was a huge Talmid Chochom and a very great person, but he made a terrible mistake and led his followers to their deaths. Surely Hashem expected them to have thought for themselves and not followed Korach, or He would not have punished them. Even the holy Rabi Akiva made a mistake, when he thought that Bar Kochba was mashiach.

Interestingly - also related to Parshas Shemos - the Jews who are most able to see the truth about current events are those who have remained the most insulated from the outside world and led the most traditional lives, and who have no ties to government, such as the Jews of Meah Shearim, and some other places. The more people have mixed with the secular world and become influenced by them, and have government ties, the more blinded they are, tragically, from seeing the murderous falsehoods being perpetrated upon the population.

Please, whoever and wherever you are, *start speaking up*. Fear not the government, fear not for your job or your status. In whatever capacity you have, whether as a Rabbi, doctor, or ordinary citizen, start calling out the injustice and the murder. Hashem will bless you for it. You are our only hope.

Wake Up Yidden! Your life may depend on this critical announcement!

Recently there has been a rash of sudden deaths in Boro Park and Flatbush. Someone who is in contact with a chevra kaddisha spoke with me and asked me to pass on the following warning to be matzil nefashos:

Lately, healthy people in their **50's, 60's, and 70's are dying at home of sudden heart attacks** from one second to the next, and by the time that Hatzala arrives it's already over, Rachmana litzlan. It used to be, he said, that people died in hospitals and nursing homes, and someone died at home only once every few months, and even then it was often a hospice patient. Now, healthy and young people are suddenly dropping for no apparent reason, at the rate of a few dying at home every week, Rachmana litzlan. **This man who warned me has his people ask the family the patient's history, and what they find that all these deaths have in common is that they recently got the covid shot, usually the booster.**

This man who is connected with a chevra kaddisha has **many, many tragic stories. Here are two examples, which happened just last week. One was with a meshulach, a Rabbi who came from another country, and had recently gotten a covid shot. He was a healthy active man in his 60's. He had been in NY for only 4 hours, was eating dinner, suddenly didn't feel well, and was gone. The other man last week was also in his 60's, and had gotten his booster 2 weeks before. He came home, collapsed and died.**

Another story is a **90 year old healthy, active man** in Boro Park. **He got his booster** and soon afterwards, had a **massive heart attack**. He did come home from the hospital, but then had another heart attack and was gone. A fourth recent tragedy was a **famous doctor who advised other people not to get the shots**, but he himself felt that he had to get it, in order to be allowed to see patients in the hospital. **After his vaccine**, he was still seeing patients on Sunday, but by **Thursday it was his own funeral**.

These stories are **NOT mysteries** to those who have been following the **warnings of the top world doctors** and scientists who said from early on that the covid shots would cause death, and the booster shots, even more so.

My friend who is a nutritionist is also getting endless requests for help from people who are extremely sick after the injections, many with life altering disabilities. If anyone thinks it's not real, it won't be long until they realize the truth, because the incidents in our community are multiplying rapidly.

This isn't limited to Brooklyn! Similiar things are happening worldwide. In California, a pediatrician I'm in contact with has gotten innumerable calls from parents begging for help for their children suffering severe health problems after the shots, and in Eretz Yisrael, not only are the headlines often showing middle aged people suddenly collapsing, just as in Brooklyn, but my friend, who is a health care practitioner, is drowning in calls from people very sick after the shots. The new thing that's happening lately is that she is getting dozens of calls each week from young people in their 20's and 30's who got the covid injection 10 or 12 months ago and now are suffering from high blood pressure, psychosis, and more. We have heard multiple reports of tragedy in Europe as well. For example, in Antwerp, a 13 year old boy needed a 4 hour brain surgery after he got a stroke post vaccination, and in England, a mother of a large family collapsed and died 2 days after her shot. These stories are only a tiny drop in the bucket of the stories we have received of tzaros and deaths in the Jewish communities alone, not to mention the millions of injuries and tens of thousands of deaths listed on the reporting sites in the broader community worldwide, subsequent to the so called vaccines.

In a major local hospital here in Brooklyn, we have numerous inside reports of an extremely high rate of stillbirths, and we have similiar reports from MANY other locations worldwide, of an unheard of rate of stillbirths, in women who were vaccinated during pregnancy.

THERE IS TREATMENT FOR COVID! THERE IS NO NEED TO CONSIDER A KILLER SHOT, which is not preventing sickness or transmission in any case! TREAT IMMEDIATELY TO SAVE EVERY LIFE! THERE ARE MANY ORGANIZATIONS TO CALL FOR HELP IF someone is SICK. WE HAVE GATHERED A COLLECTION OF LIFESAVING ORGANIZATIONS THAT EXIST TO HELP THOSE WHO ARE ILL WITH CORONA.

IT IS CRITICAL TO SIMPLY TREAT AT THE FIRST SIGN OF SYMPTOMS. THE TEST IS WORTHLESS - WHETHER POSITIVE OR NEGATIVE, IT MEANS NOTHING. SIMPLY TREAT THE PERSON WITH THE EFFECTIVE TREATMENTS IF THEY ARE ILL. THE TREATMENTS ARE BENEFICIAL FOR ANY VIRUS, BUT MUST BE STARTED VERY EARLY ON.

EMAIL SENT TO A BRITISH RAV BY FUNERAL DIRECTOR JOHN O'LOONEY. CONTACT NUMBER INCLUDED.

Thank you for reaching out to me.

I write to you to confirm my concerns regarding Covid and the vaccinations. I voice these concerns here.

<https://www.bitchute.com/video/gigUyK3yLtMU/?fbclid=IwAR1x01wsiSSXX1B72R7I7vOwnViQyuKSvL-ZMDfIANxP4N1nP-aAttX5vCg> From the outset huge efforts were made to fake the Covid death numbers and I saw cancer patients, dementia patients and basically anyone getting into an ambulance relabeled as a Covid death. Indeed there were even huge financial incentives paid for Covid being placed on a death certificate.

More chillingly I believe many people were killed using Midazolam in care homes and hospitals and a number of nurses have contacted me to confirm this to me.

I believe that this has been deliberately used to convince, scare and blackmail people into begging for an injection - an injection that is now killing them in large numbers.

Watch the video this is my first time the count of my experience as a funeral director and I would hasten to add that over 70 other funeral workers from within the industry including mortuary staff have been in touch with me to confirm my fears and suspicions and like me they see a terrible evil and wrong happening and they are all very scared.

If we do not act soon the stop this madness these demons will invent new variants every month indefinitely and slowly kill off as many people as possible in my opinion, whilst exploiting innocents with lies and propaganda based on fear - they are the worst kind of evil who now even target children.

In September on Tuesday the 21st of this year I met with Sir Graham Brady at Number One Birdcage Walk in Westminster. I was surrounded by 16 or 18 of the finest scientific and legal minds globally. These people included Dolores Cahill, Tess Lawrie, Sucharit Bhakdi, Mike Yeadon (former Pfizer Vice President), Peter McCullough.

And many others were present. Together we gave testimony to Sir Graham after introducing ourselves in our respective fields, reams of evidence and reams of paper work were presented to Sir Graham by the above mentioned people to support the claims made - claims I see first hand laying in coffins almost weekly now, usually from a death caused by thrombosis resulting in heart attack, stroke or aneurysm and all shortly after a vaccine - sometimes as little as an hour. The blood clot numbers I have never ever seen in such numbers in 15 years as an undertaker and again this has been confirmed by numerous mortuary staff I have spoken to and funeral workers who see the death certificates and see the coroners paperwork and see the testimony from very upset and angry family members.

I have written to the chief coroner of England and included 40 of the above-mentioned doctors and scientists in the email I have had an automatic reply that he has received my email yet a month later he still does not respond and I have written twice in the last month with real valid horrific concerns - why isn't he responding?

I am being totally ignored - why won't he do his job?

I have attached a video to this email of a news report recently shown on UK news column on Friday I believe of last week - it clearly tells a chilling story that supports what I have said.

Here is a link also to a tender issued by the government to recruit a software company to write a program to collate all of the expected damage and injuries in job recipients this was long before the jobs were rolled out and clearly government were very very aware of what was going to happen but proceeded anyway and this is unforgivable.

Here is that tender, if you read it fully you will see they knew full well people would be hurt and killed - it beggars belief we have men and women with no moral compass and a clear psychopath mindset slaughtering millions.

<https://ted.europa.eu/udl?uri=TED:NOTICE:506291-2020:TEXT:EN:HTML&src=0>

I want justice - I want this madness to stop. Please save these children they now target.

I will drop whatever I am doing and do anything that I can to help you achieve that I'm available to you 24 hours a day seven days a week. Please please can you do something XXXXXXXXXXXX and get me an audience with someone who can make a difference. Children are dying.

Just to add. I would hasten to add I don't think there is no Covid whatsoever - but it is primarily winter flu or similar and possibly something man made and certainly man driven - it just isn't what it has been made out to be at all.

I'd hasten to add I have personally washed and dressed about 160 people now labelled as Covid victims.

Due to the streamlining of the process after death with no doctors or police in attendance or present (which is totally wrong) often now I've collected these people still warm to the touch after being forced under instruction from Thames valley police to "declare" death myself in care homes which I am not qualified to do and then also with the burden of having been instructed by Thames valley police to then "raise any concerns" to the coroner should I see any.

Which frankly is a joke because the chief coroner won't ever respond when I do raise concerns. He totally ignores me.

I've never ever worn a mask to look after these poor people - it's a miracle I'm alive surely?

My wife and colleague have also helped me wash and dress these Covid victims as well and again they are and have been in perfect health the whole time.

It's horrific that people have been treated so appallingly.

We really do need to act now to save as many people as possible before yet another invented variant and subsequent injection is forced into people with blackmail, terror and coercion. Regards
