Project Veritas released a **[new video today exposing Food and Drug Administration \[FDA\] Executive Officer, Christopher Cole](#)**, who inadvertently revealed that his agency will eventually announce that annual COVID vaccinations will become policy.

Here are some of the highlights from today's video:

- **FDA Executive Officer, Christopher Cole: “You’ll have to get an annual shot [COVID vaccine]. I mean, it hasn’t been formally announced yet because they don’t want to, like, rile everyone up.”**
- **Cole on President Joe Biden: “Biden wants to inoculate as many people as possible.”**
- **Cole on plans to approve vaccine for toddlers: “They're not going to not approve [emergency use authorization for children five years old or less].”**
- **Cole on pharmaceutical companies: “There’s a money incentive for Pfizer and the drug companies to promote additional vaccinations.”**
- **Cole on the financial incentive for pharmaceutical companies: “It’ll be recurring fountain of revenue. It might not be that much initially, but it’ll be recurring -- if they can -- if they can get every person required at an annual vaccine, that is a recurring return of money going into their company.”**
- **FDA official statement: “The person purportedly in the video does not work on vaccine matters and does not represent the views of the FDA.”**

You can watch the full video by **[CLICKING HERE](#)**.

Why is the FDA potentially hiding the fact that annual COVID shots will be enforced? Is the FDA worried about upsetting the American people with that alleged information?

A lot of questions remain unanswered, and the public deserves to know the truth.
