

# The Extraordinary Story of How Governments Suppressed Effective COVID Treatments and Targeted Physicians Who Prescribed Them

*Public health authorities knew about chloroquine and other treatments for COVID-19 before there was a COVID-19 — because they had figured it out for the 2003 SARS epidemic and the 2012 MERS epidemic. But they hushed it up.*

By **Meryl Nass, M.D.**

**Miss a day, miss a lot.** *Subscribe to The Defender's Top News of the Day. It's free.*

In 2020, I compiled a [list of more than 50 ways](#) authorities and pharma companies in multiple countries stopped the use of chloroquine drugs for COVID. This was (and is) a stunning collection, widely read and reproduced on many websites.

When you read it, you are astounded to learn that all the U.S. (and many international) public health agencies took many different actions that led to increased deaths and destruction from COVID and prolonged the pandemic.

“Avoiding the Trump drug” served as a great cover story. Taking hydroxychloroquine for COVID was equated to drinking bleach.

But here’s the kicker: The authorities knew all about chloroquine and other treatments for COVID-19 before there was a COVID-19 — because they had figured it out for the 2003 SARS epidemic and the 2012 MERS epidemic, both caused by related coronaviruses. But they hushed it up.

## BUY TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'

Five Centers for Disease Control and Prevention (CDC) U.S. scientists (employed by the U.S. government), along with three Canadian government scientists, in 2005 published a [paper](#) showing chloroquine was an effective drug against SARS coronaviruses. European scientists [showed](#) the same thing in 2004.

> [Virol J.](#) 2005 Aug 22;2:69. doi: 10.1186/1743-422X-2-69.

## Chloroquine is a potent inhibitor of SARS coronavirus infection and spread

[Martin J Vincent](#)<sup>1</sup>, [Eric Bergeron](#), [Suzanne Benjannet](#), [Bobbie R Erickson](#), [Pierre E Rollin](#), [Thomas G Ksiazek](#), [Nabil G Seidah](#), [Stuart T Nichol](#)

Affiliations + expand

PMID: 16115318 PMCID: [PMC1232869](#) DOI: [10.1186/1743-422X-2-69](#)

The CDC paper concluded: "... chloroquine has strong antiviral effects on SARS-COV infection ... suggesting both prophylactic and therapeutic advantage."

Chloroquine looked very promising for both prevention and treatment of the first SARS. After all, it has been used for many decades to prevent and treat malaria. (I took it for prevention, and later for treatment, 50 years ago).

Nine years later, in 2014, scientists at the National Institute of Allergy and Infectious Diseases (NIAID) — the agency run by [Dr. Anthony Tony Fauci](#) — published a [study](#) showing the same thing.

Moreover, the NIAID study revealed that not only did chloroquine work in vitro against the MERS coronavirus, but dozens of existing drugs, which could have been tested in patients as soon as the pandemic started, were also effective against SARS and MERS coronaviruses.

[Antimicrob Agents Chemother.](#) 2014 Aug; 58(8): 4885–4893. doi: [10.1128/AAC.03036-14](#)

PMCID: PMC4136000 | PMID: [24841273](#)

## Repurposing of Clinically Developed Drugs for Treatment of Middle East Respiratory Syndrome Coronavirus Infection

[Julie Dyall](#),<sup>a</sup> [Christopher M. Coleman](#),<sup>b</sup> [Brit J. Hart](#),<sup>a</sup> [Thiagarajan Venkataraman](#),<sup>b</sup>  
[Michael R. Holbrook](#),<sup>a</sup> [Jason Kindrachuk](#),<sup>a</sup> [Reed F. Johnson](#),<sup>c</sup> [Gene G. Olinger, Jr.](#),<sup>a</sup>  
[Peter B. Jahrling](#),<sup>a,c</sup> [Monique Laidlaw](#),<sup>d</sup> [Lisa M. Johansen](#),<sup>d</sup> [Calli M. Lear-Rooney](#),<sup>e</sup>  
[Pamela J. Glass](#),<sup>e</sup> [Lisa E. Hensley](#),<sup>a</sup> and [Matthew B. Frieman](#)<sup>1b</sup>

This is what the NIAID authors wrote:

"Here we found that 66 of the screened drugs were effective at inhibiting either MERS-CoV or SARS-CoV infection in vitro and that 27 of these compounds were effective against both MERS-CoV and SARS-CoV. These data demonstrate the efficiency of screening approved or clinically developed drugs for identification of potential therapeutic options for emerging viral diseases, and also provide an expedited approach for supporting off-label use of approved therapeutics."

Just in case you think these papers were flukes, two unrelated groups of European scientists found essentially the same thing. This [2014 European paper](#) was published back-to-back with the NIAID paper.

I have cited the 2004 European [paper](#) elsewhere, and these citations can also be found in Robert F. Kennedy, Jr.'s book, "[The Real Tony Fauci](#)," which according to Amazon, has now sold more than 800,000 copies. Please read it.

On the other hand, if you are seeking misinformation on COVID, I'd recommend Fauci's own book, "[Expect the Unexpected](#)."

I have to repeat myself because the information is so shocking and I don't want you to miss it: Our governments already knew of options for treating COVID before it appeared — but instead of immediately trying these already identified, safe, cheap and available drugs, and offering early treatments, they did everything they could to stop people from obtaining the chloroquine drugs.

Please read my long [article](#) on this suppression and the two articles I wrote [here](#) and [here](#) about how patients were administered borderline lethal doses of hydroxychloroquine to give the drug a black eye.

Check the links. Verify that what I have just written is correct. Human beings planned and carried out these medical crimes against humanity. Who are those humans? What are they doing now?

This has to be investigated and justice obtained, to prevent such crimes from happening to patients ever again.

The “Why?” and “How could this be?!” requires people to take a huge leap, in order to understand the world we live in.

Many people don't have the fortitude to dissect their worldview and rebuild it in accord with the facts that have spilled out over the last two years.

But I am about to present some more facts that I hope you can assimilate into your understanding of the world. It might require a stiff drink, or perhaps some chocolate.

Whatever it takes, read on. It might save your life or someone else's.

### **Ivermectin sales explode**

[Ivermectin](#) was not identified in the studies I mentioned above as a potentially useful coronavirus drug.

But some people knew it was likely to work in early 2020, because the French [MedinCell](#) company, working with Monash University and supported by [Bill Gates](#), was developing an injectable version (which would be able to be patented).

MedinCell issued a [press release](#) about this on April 6, 2020, and an [informational paper](#) on April 23, 2020.

There was a brief run on the veterinary drug at this time in the U.S., according to a [warning](#) issued April 10, 2020, by the U.S. Food and Drug Administration (FDA), indicating some people knew it might be an effective COVID treatment and were acquiring veterinary versions.

But there was not a lot of buzz and sales did not take off at that time.

Here is what the FDA said on April 10, 2020:

“FDA is concerned about the health of consumers who may self-medicate by taking ivermectin products intended for animals, thinking they can be a substitute for ivermectin intended for humans ... Please help us protect public health by alerting FDA of anyone claiming to have a product to prevent or cure COVID-19 and to help safeguard human and animal health by reporting any of these products.”

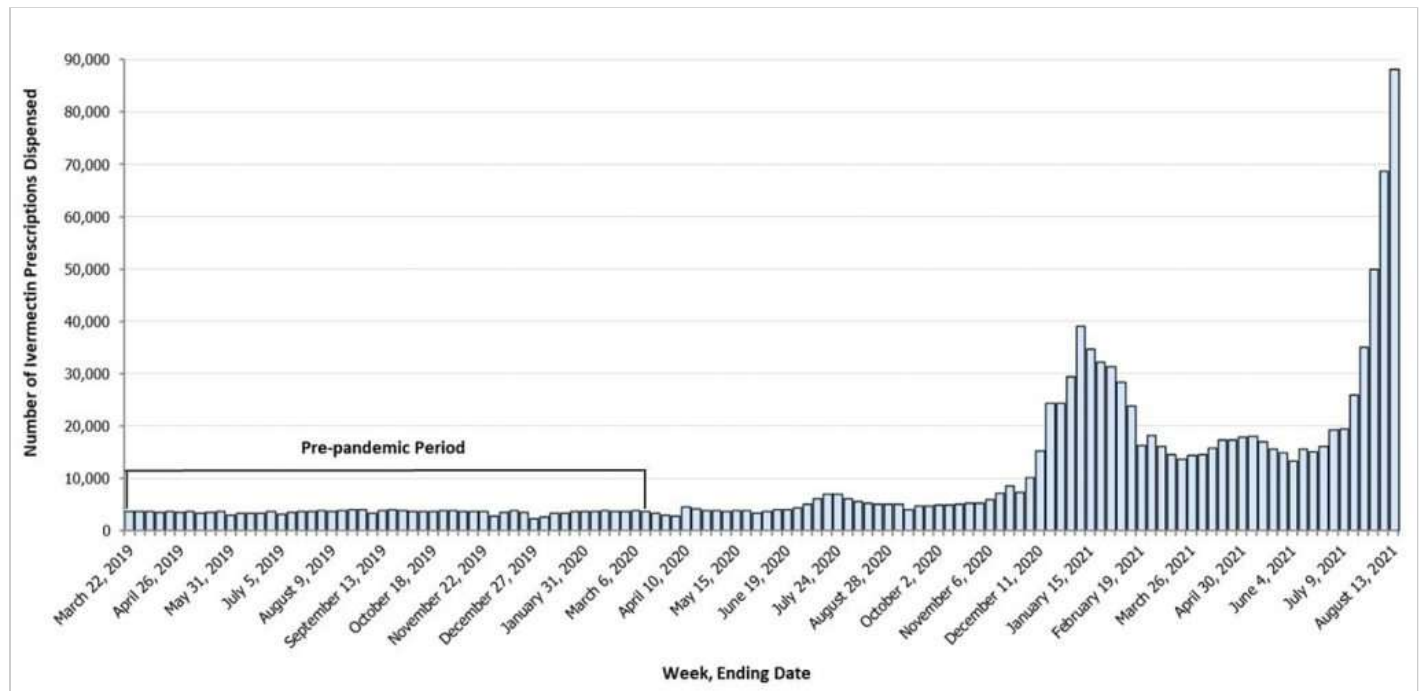

In December 2020, a full eight months later, Sen. Ron Johnson (R-Wis.) held a Senate hearing that was focused on ivermectin's benefits for COVID. Intensive care specialist Dr. Pierre Kory, originally a New Yorker, gave a particularly [compelling speech](#).

People began paying attention to the drug. YouTube then removed Kory's speech — censoring a Senate hearing!

I think the authorities were initially scared to repeat the same tricks with ivermectin they had used to beat down the chloroquine drugs. And because ivermectin has efficacy late in the disease as well as at the start, and is not toxic at several times the normal dose, some of the tricks used against chloroquine (giving it too late in the disease course or overdosing patients) simply would not work with ivermectin. The U.S. authorities kept quiet.

South Africa was the trial balloon. On Christmas Eve 2020, South African authorities banned the importation of ivermectin. However, several local organizations mounted legal actions, and they won. Within several months ivermectin was back on the shelves.

Thanks in great measure to the [Frontline COVID-19 Critical Care Alliance](#), ivermectin's popularity gradually began to explode. Then the CDC published a [report](#) in late August 2021, showing ivermectin prescriptions had quadrupled in a month, and the drug was now selling at 25 times the pre-COVID rate.

[Business Insider reported](#), “More than 88,000 prescriptions for the drug were filled by pharmacies in the week ending August 13, the CDC said in a report published August 26.”

Apparently, this terrified the powers that be. What if the pandemic got wiped out with ivermectin? It worked too well! Would that be the end of [vaccine mandates](#), [boosters](#), [vaccine passports](#) and digital IDs? The end of the [Great Reset](#)?

### Targeting doctors

Something had to be done and fast. It had to be big. It had to be effective. Public health officials couldn't simply take the drug off the market — that would require a long process and would leave a paper trail.

What to do? There was probably only one option: Scare the pants off doctors. Loss of license is the very worst thing you can do to a doctor. Threaten their licenses and they will immediately fall into line. You can't get a prescription if there is no doctor to write it.

The Philippines Department of Health [tested](#) the strategy.

The powers that be could also scare the pharmacies. This required stealth — no paper trail. It required intimidation, backed by a one-two punch: actually suspending doctors' (and maybe pharmacists') licenses.

You couple that with a huge media offensive, and threats from an industry of medical “nonprofits.” You invent “misinformation” as a medical misdemeanor, studiously failing to define it. You make people think the legal prescribing of ivermectin and hydroxychloroquine is a crime, even though off-label prescribing is entirely legal under the [Federal Food, Drug and Cosmetic Act](#).

Did Fauci give the order? Was it CDC Director Dr. Rochelle Walensky? Maybe it was acting FDA Commissioner [Dr. Janet Woodcock](#)?

It was probably some combination, plus the public relations professionals managing the messaging and the media.

## BUY TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'

### Here's what happened ...

1. Sen. Ben Ray Lujan (D-N.M.), along with several other senators, [introduced the "Health Misinformation Act"](#) in July 2021, because "misinformation was putting lives at risk," Lujan said. A huge supporter of COVID vaccinations, the 49-year-old senator [suffered a stroke](#) on Feb. 1.

2. The pharmacies suddenly could not get ivermectin from their wholesalers. No reason was given except "supply and demand." But it seemed the supply was cut off everywhere. Ivermectin was dribbled out by the wholesalers, a few pills a week per pharmacy, not enough to supply even one prescription weekly.

Some powerful entity presumably ordered the wholesalers to make the drug (practically) unavailable — with no shortages announced. I called the main manufacturer in the U.S., Edenbridge, and was told they were producing plenty of ivermectin.

Hydroxychloroquine had been restricted in a variety of ways, determined by each state, since early 2020. It had also been restricted by certain manufacturers and pharmacy chains in 2020. Suddenly, in September 2021, it became considerably harder than it already was to obtain.

3. In late August 2021, the CDC sent out a [major warning](#) about ivermectin but provided only two examples of anyone having a problem with the drug: One person overdosed on an animal version, and one overdosed on ivermectin bought on the internet. This should not have been news. However, pharmacists and doctors read between the lines and knew this was code for "verboten." Almost all of them stopped dispensing ivermectin at that time. It should be of interest to everyone that our health agencies now speak in coded messages to doctors and pharmacies, presumably to avoid putting their threats on paper and being accountable for them. What a way for government to do business.

4. Also in August 2021, various "nonprofit" medical organizations started issuing warnings, in concert, regarding doctors prescribing ivermectin or hydroxychloroquine, and spreading misinformation — especially about COVID vaccines. These organizations included the [Federation of State Medical Boards](#) (FSMB), the American Medical Association (AMA), the American Pharmacists Association and several specialty boards.

Here is an example of the [AMA's language](#): "A handful of doctors spreading disinformation have fostered belief in scientifically unvalidated and potentially dangerous "cures" for COVID-19 while increasing vaccine hesitancy ..."

These organizations told doctors they could lose their licenses or board certifications for such behaviors. Mind you, none of these so-called nonprofit organizations has any regulatory authority. Nor do I believe they have any authority to claw back a board certification. They were blowing smoke. And they were probably paid to do so. Who paid them?

5. Over the course of three days at the end of August 2021, national media reported on four doctors in three states whose boards were investigating them for the use of ivermectin.

Hawaii's Medical Board [went after](#) Hawaii's chief medical officer:

“The Hawaii Medical Board has filed complaints against Maui's top health official and a Valley Isle physician following reports that they backed COVID-19 treatments that state and federal health agencies advise against.”

They really wanted to make an example by going after the state's chief medical officer, who had the guts to treat COVID patients. Clearly, the orders are coming from high up on the food chain.

Here were some of the other August headlines I collected about doctors who legally prescribed a fully approved drug off-label:

**Tampa Bay Times**

**Doctor advising DeSantis promoted ivermectin to treat COVID-19 despite FDA warnings**

Against FDA warning, Houston doctor claims to have used Ivermectin on 'thousands' of COVID patients

**Doctor who used ivermectin to treat Covid patients, inmates under investigation by medical board**

6. The FSMB is an organization that assists 71 state and territorial medical boards with policies, training, etc. Members pay dues and the organization accepts donations. FSMB has its own foundation, too. Its president [earns \\$777,255/year](#) — not bad for a backwater administrative job at an organization headquartered in Euless, Texas.

After the FSMB instructed its members that misinformation was a crime, somewhere between eight and 15 of its member boards began to take action. ([Media](#) have reported that eight, 12 or 15 boards of its 71-member boards did so, according to the FSMB, which is closely monitoring the results of its calumny.)

7. On Feb. 7, 2022, the U.S. Department of Homeland Security issued its own [dire warning](#) about the spread of misinformation, disinformation and a neologism, “malinformation:”

“The United States remains in a heightened threat environment fueled by several factors, including an online environment filled with false or misleading narratives and conspiracy theories, and other forms of [mis-, dis- and malinformation](#) (MDM) introduced and/or amplified by foreign and domestic threat actors.

“These threat actors seek to exacerbate societal friction to sow discord and undermine public trust in government institutions to encourage unrest, which could potentially inspire acts of violence. Mass casualty attacks and other acts of targeted violence conducted by lone offenders and small groups

acting in furtherance of ideological beliefs and/or personal grievances pose an ongoing threat to the nation.”

Thus it appears that misinformation and disinformation have been selected to play an important role in a newly developing narrative, as the pandemic restrictions and accompanying narratives become long in the tooth.

8. I presume the majority of the 71 medical boards’ attorneys knew something about the U.S. Constitution, knew that every American has an inalienable right to freedom of speech, and simply ignored the FSMB’s exhortation to go after misinformation spreaders.

The Maine Board of Licensure in Medicine, however, went along. Three doctors in Maine, including me, recently had their licenses suspended or threatened for writing waivers for COVID vaccines, “spreading misinformation” and/or prescribing ivermectin and hydroxychloroquine (all of which are legal activities for doctors).

But boards have broad powers to intervene in the practice of medicine, and their members are shielded from liability as agents of the state. And so they went after a chronic Lyme doctor several years ago, who found, as expected, it would be too onerous to fight back, so he gave up his license.

9. Here is what the Maine Board [claims](#) about me:

“The board noted that Ivermectin isn’t Food and Drug Administration “authorized or approved” as a treatment for COVID-19 in the suspension order ...

“The board said that her continuing to practice as a physician ‘constitutes an immediate jeopardy to the health and physical safety of the public who might receive her medical services, and that it is necessary to immediately suspend her ability to practice medicine in order to adequately respond to this risk.”

I am 70 years old, and my medical practice was set up as a service so that everyone could access COVID drugs who wanted them. My fee was \$60 per patient for all the COVID care they needed.

I am sure the Maine Board had calculated that given all the above, I would not challenge the board’s suspension and would simply surrender my license as it would probably cost hundreds of thousands of dollars to fight the board’s actions in court.

However, I was surprised to find that on the day my license was suspended, there was massive national publicity about my case. The story was on [The Associated Press wire](#) and covered from the San Francisco Chronicle to the [Miami Herald](#). And for some reason, it was not behind the usual paywall.

[The Hill](#), [Newsweek](#), the Daily Beast and many other publications all ran hit pieces about me.

I gathered that my situation was bigger than just a renegade Maine medical board: I had been selected to serve as an example to physicians nationwide who might be prescribing early treatment for COVID.

Once I realized I was being used as a poster child in a national fear campaign designed to purge doctors who think independently, I decided to fight back. Fortunately, [Children’s Health Defense](#) is helping with my legal expenses, which is what allows me to mount a strong attack against the bulldozing of free speech, patient autonomy and choice, and the doctor-patient relationship.

There is a lot riding on the outcome.

**Di Ziggy** → Peggy Nieto • 2 days ago

I think Americans have lost what President Lelenskyy has shown the world.

How it fight, no matter what because the alternative is to change what your country stands for and believe in. United We Stand, Divided We Fall.

At this point, Fauci'Stein and the Biden/Harris Admin. have proven the American People (CITIZENS) need to remove those who seek to RADICALLY CHANGE THE FUNDAMENTALS ON WHICH OUR COUNTRY WAS FOUNDED ON.

It seems like easy pickin's for an up and coming attorney to make a name for his self, like Pres Lelenskyy, only here, its your voice that needs to be heard, unfortunately some lives have already been taken do to this Plandemic and the next Plandemic is around the corner, which just may take your voice and vote away permanently.

How many American Citizens are left in our country?

Dr. Nass is the most genuine and intelligent person that I have come to know about in a very long time. She is honest, passionate, brave and a very determined lady.

We have only hit the tip of this iceberg and it is only happening because of angels such as Dr. Nass. Good work. Stay strong. We got your back. Peace.

10 ^ | v • Reply • Share ›

**Deirdre I Hobson** → Kim from Brooklyn • 4 days ago • edited

its only happening NOW Kim that Dr Nass is being heard, because this fraud is irrational and people re now questioning it- across the World, after 2 years of the story slowly being revealed and more to come. RFK Jnr has been waiting for years on behalf of the parents of Autistic children who KNEW it was not their fault that the child had these problems.

What about all the people who over 20+++++ years, have died, debilitated and their lives DESTROYED, and a hell before many did die, and Drs not knowing what to do, except antibiotics and Blg Pharma pills that did not work and made them worse - all because of Fauci Lab and the messes HIVirus/XMRVirus emanating from there..those blighted people who had HIV-AIDs.

I am not being disrespectful of Dr Nass here, but an angel? because of timing, she is now ABLE to be heard, Many of us have lost so so much and when one tried to get Lawyers to listen - that is if you could speak intelligently, then as one Lawyer said to me, when I was able to get off the bed and use teh slowly written notes over weeks/months, I told this Lawyer that I had been unable to respond to his letter. He said " there are some you don't forget". like sticking a knife into me.

He only listened because his Partner told him to, as I had been a very good client of that Law Company.

For the last 40 years we have been EXISTING in weird times because of this AGENDA of Psychopaths. How many of us acted through out political and other groups to stop strange

new laws and many other aberrations' of our being, and were IGNORED. Letters not acknowledged etc.,

We must have a Nuremberg 2.0. These medical license boards need to be dismantled, and all the employees deposed. We need to know what these people knew, and when they knew it. It don't care if it goes on for years. The cost will pale next to these death shots that have been forced on the world. We need to do this with every employee of every government health agency in the country, and every politician who went along with this travesty, and that includes Fauci, Collins, Walensky, Chris Wray, the DOJ, and the current President. People need to pay a very high price for their treason. We need a punishment so severe that no one will attempt this sort of thing in America for a very long time.

**Sarah Travagline** • 8 days ago

Ivermectin-based treatments have cured hundreds of thousands of COVID-19 infected patients worldwide. Ivermectin has also successfully protected thousands of doctors who have been treating COVID-19 infected patients.

<https://travag.blog/2020/09/05/proven-effective-triple-therapy-ivermectin-zinc-and-doxycycline/>

As the evidence throughout this report reveals, scientific studies and clinical trials have proven that Ivermectin-based treatments kill the SARS-CoV-2 virus in humans with little, if any, side effects.

Even better news than all of that, Ivermectin when combined with Zinc is effective in killing many RNA viruses, such as the common cold, influenza, SARS, COVID-19, Dengue Virus, hepatitis C, hepatitis E, West Nile fever, Ebola, rabies, polio, and measles.

As The Journal of Antibiotics recently reported: "Ivermectin proposes

many potential effects to treat a range of diseases, with its antimicrobial, antiviral, and anti-cancer properties as a wonder drug. Zika, dengue, yellow fever, West Nile, Hendra, Newcastle, Venezuelan equine encephalitis, chikungunya, Semliki Forest, Sindbis, Avian influenza A, Porcine Reproductive and Respiratory Syndrome, Human immunodeficiency virus type 1, and severe acute respiratory syndrome coronavirus.

IF YOU CAN'T GET IVERMECTIN, TAKE ZINC , QUERCETIN, VIT D3 & VIT C PLUS A COMBINATION OF TURMERIC PLUS NEEM CAPSULES

8 ^ | v • Reply • Share ›

**Crispin Pemberton-Pigott** → Sieglinde Koenigseder • 7 days ago

One elderly employee with multiple risk factors caught COVID three weeks ago. I found her Fluvoxamine, Azithromycin, Vit D3 and zinc. She was better in 5 days, plus another 5 to shake the wet cough. The combo is very effective.

3 ^ | v • Reply • Share ›

**Mary Nelson** → Crispin Pemberton-Pigott • 4 days ago

That may be possible with a GOOD doctor. The D3 I have is a capsule with D3/K2 combo. They work together.

2 ^ | v • Reply • Share ›

**Carroll Nigg** → Sieglinde Koenigseder • 6 days ago

The key to this is getting your immune system as strong as possible. Vitamin D3/K2 is crucial to take daily as it is protective against many diseases and studies continue to show that most, up to 80%, are deficient. We take Liposomal C, D3/K2, Omega 3, Zinc, a mineral supplement containing selenium, Quercetin, Glutathione, and Magnesium chloride. It may seem like a lot but many are protective and work synergistically with some of the others. There is a physician who uses a betadine 1% in saline nasal type spray every four hours when he is working with patients. Covid, flu, colds are mucosal and this misting is protective. One teaspoon of 10% Betadine Solution to 3 ounces of saline for the misting solution. Two to three sprays in nose every four hours. We will continue to use this when we are out during flu and cold seasons. Do your own research and go to sites that aren't tools of the Globalists. Find a Naturopath that will write a prescription for Ivermectin and others - we did.

We have heard enough of the atrocities. Tell us what to do to get rid of these people. Is litigation being commenced? The only person I know of who could handle this is RFK, Jr., himself. Is it in the works? We need hope and just blabbing with our elected "representatives" who are all vaccine pushers will not help us.

WHY is it that TWO YEARS into this, CHD/The Defender is still promoting the CORE LIES of the COVID PSYOP? a) that SARS-CoV-2 exists b) that it has been proven to cause clinical disease, c) that some test exists to measure the spread of this putative "disease", and WORSE OF ALL, that people with either the sniffles or a positive PCR test should eat literal INSECTICIDE to protect us from the Death Plague Cooties. Unreal.

There is a virus and it causes COVID. For some it is sniffles or asymptomatic and for others it is a severe illness. The drugs work when given early enough. It is contagious. CQ, HCQ and ivermectin are human drugs, NOT pesticides. Safe enough to have been OTC drugs in most of the world.

> There is a virus

If you think the FICTITIOUS, "in-silico" (computer model) virus SARS-CoV-2 exists, then I suggest you listen to some

Dr Andrew Kaufman  
Dr Stefan Lanka  
Dr Tom Cowan  
Drs Samantha+Mark Bailey  
Dr Kevin Corbett  
Christine Massey, Msc

It is a concern that there isn't a definitive position on this across the board....

I further find it interesting that an antiparasitic can diminish a coronavirus...I was listening to a Natural Path discuss that there is a process for healing the body, which starts with the elimination of parasites as they are bogging down the immune system and causing mass inflammation with their numbers and their waste...we use to practice eliminating parasites from our systems at least a couple of times a year for our overall health...this has been lost with the medical industry at the helm. Anyway, once the parasites are killed off, the body can then move on to other issues at hand that are causing imbalance.

If a Democrat can file "Health Misinformation Act" because of their (supposed) concern for our health and well-being, then where the

heck is their concern for the MAJOR KILLER of people between the ages of 18 to 45 years... FENTANYL from Mexico via China? Is it because one is dealing with YOU being totally controlled with lockdowns and mandates and the other gives them NO CONTROL OVER YOU?

In either case, the reason they do anything at all is for THEIR SOLE SELF SERVING BENEFIT, THEY COULD CARELESS ABOUT YOU OR ME.

"THEY" meaning the current administration BIDEN/HARRIS and their alike.

Go Meryl! If nothing else, your integrity is intact. Although I feel for you deeply, and for the patients who have lost your help, your "story" is making waves and helping people to wake up to the fraud that was unleashed on us. I pray that you will succeed with your claims in court and that your license will be restored. People in Maine and the world over need you. As a non-American I can only watch from a distance, with utter dismay, what is happening in the USA. Unfortunately, what the USA does is copied instantly by governments around the world.

FDA seems to hate cheap, generic drugs THAT WORK, BUT we are not allowed to mention the benefits of these supplements-that makes them "drugs".

Federal Disease Accelerators

The purpose in suppressing these inexpensive drugs (which were approved for human use in 1996) was so expensive (non-immunizing) immunizations could provide billion dollar fortunes for the drug manufacturers and their stock holders. Wow! What an astounding governmental approved CRIMINAL edict (the mandates). Do not trust ANY 3 letter (acronyms) agency.

If the the "source" were used, the "new world order" "great reset"

if the the "cures" were used, the "new world order", "great reset", depopulation agenda would have FAILED, "big pharma" would have lost BILLIONS, PRESIDENT TRUMP would have been sitting in the oval office instead of the MORON we have now, and the "wealthy elites" that are the REAL power and control in this country, and much of the world that have been pushing the idea of DEPOPULATION, would have been pissed their nefarious plan had been stopped. It was ALWAYS about CONTROL, POWER, and taking as much money from the frightened , brainwashed, "peasants", before they finally expire from the "side effects" of the "MANDATED" "death jabs", and continual; "boosters".
