

Recording of June 12 awareness and inspiration event regarding the grave threat posed by FDA meeting:

Baruch HaShem, this was a phenomenal event which not only importantly explained various dangers we may not have previously been aware of, but stressed the huge power of Tefilla to remove all the threats.

The event also ended up covering other critical topics that weren't even planned for today, such as the absolute necessity and duty for all of us to speak up against murder in the form of abortion, and a partial explanation of why the government of the State of Israel injected their people with poisonous products.
